PROJECTS

EntreLink: Empowering Entrepreneurs

DEC 2024 - PRESENT

Technologies Used: React, MERN Stack, AI, JavaScript, Node.js, MongoDB

- Description: Developed a platform designed to connect entrepreneurs with mentors, investors, and fellow entrepreneurs. The platform features:
 - Community Page: Allows to search for job/intern opportunities, Discussions on topics, Challenges given by other Entrepreneurs.
 - Event Page: Allows users to discover and participate in online or location-based entrepreneurship events.
- Impact: The platform aims to improve entrepreneurship ecosystem connectivity and provide better opportunities for growth.

Timeblocker with LangDB API

FEB 2025 - MAR 2025

Technologies Used: React, TypeScript, LangDB, JavaScript, Node.js, API Integration

- Description: Developed a time management and productivity application with integrated AI features. Key functionalities include:
 - To-Do List
 - AI Suggestion
 - Time-Blocking Calendar
 - Analytics Dashboard
- Impact: The app helps users streamline their time management and improves productivity by using AI to optimize daily schedules.
